

Little Update

Mandrake, Friday 24 November 2006 - 13:08:04

Seems this update from my side is waay overdue. But what's been happening in the past months activity..

From a Battlefield perspective, additional patches have been released so that the version is now up to 1.41, this update will of course be in the download section asap.

Other than that, the next Battlefield game, Battlefield 2142, has been released. I have not yet had the opportunity to try this one out myself other than a short while playing the multiplayer demo, which was released some time ago. A couple of patches have also been released for this title - the first one was released the day the game hit the stores, while the 1.05 patch was released recently. Once again, the download section will be updated to hold Battlefield 2142 stuff.

On the Xbox side of things (the original Xbox that is), the XBMC project has received many updates, and is now at version 2.0.1 - stand by for a newspost containing all the changes (it's huge).

That's it for now, I'll try to keep the updates flowing.
