Xbox Media Center 2006-03-06

Mandrake, Tuesday 07 March 2006 - 19:56:26

Once again it's been waaaay to long since I've posted an update on the current status of the Xbox Media Center Project, so I'm going to bring it all here. It will be posted in the same way as last where it only will be the changelog from the lasted week or so that'll be here on the frontpage, while the rest of the updates can be read by clicking the "Read the Rest" link under the list.
 - 06-03-2006 added: tag to label control (for display of numbers)
 - 06-03-2006 added: Skin.SetBool and Skin.Reset functions.
 - 06-03-2006 changed: Per button images in scrolling button scrollers only show when scrolling has completed.
 - 06-03-2006 fixed: auth http streams containing special characters(mplayer.dll)
 - 06-03-2006 updated: tinyxml to version 2.4.3
 - 06-03-2006 fixed: ms soundtrack directory showed two parent folder items
 - 06-03-2006 fixed: mem leak in ms soundtrack directory
 - 06-03-2006 fixed: cdda disc without cddb info shows only a tracknumber as label
 - 06-03-2006 fixed: [1345507] First track of CD Audio not playing on latest XBMC builds!
 - 06-03-2006 updated: Italian language file (Thnx to kotix)
 - 06-03-2006 updated: Chinese (Traditional) language file (Thnx to omenpica)
 - 06-03-2006 updated: German (Austrian) language file (Thnx to CEOMR)
 - 06-03-2006 updated: German language file
 - 06-03-2006 updated: Dutch language file (Thnx to console-ombouw)
 - 06-03-2006 updated: Portuguese (Brazil) language file (Thnx to mvbm)
 - 06-03-2006 updated: Swedish language file (Thnx to blittan)
 - 06-03-2006 updated: Norwegian language file (Thnx to vnm)
 - 06-03-2006 changed: Album Info and Video Info cover images are no longer set to keep aspect ratio in the code (it can now be controlled in the skin).
 - 05-03-2006 fixed: dvdplayer would sometimes lock up when trying to restore a bookmark
 - 05-03-2006 fixed: if libdvdnav threw an exception, dvdplayer would lockup
 - 05-03-2006 fixed: audio stream opening could be delayed in dvdplayer causing stuttering
 - 05-03-2006 fixed: playing quicktime files would make xbmc leak 100k per file. reduced to about 50k.
 - 03-03-2006 fixed: Better music database lower case comparisons (paths are stored as is, but compared lower case).
 - 03-03-2006 added: "Clear Default" to the root bookmark context menu
 - 03-03-2006 fixed: album lookups with a single 100% match in the list
 - 03-03-2006 changed: file manager, a new folder is now highlighted as current item after it is created
 - 03-03-2006 fixed: music nav, after getting album information the thumb of the item is not updated
 - 03-03-2006 changed: music nav, genres, artists and albums are not cached to disc anymore
 - 03-03-2006 fixed: music nav, a cached dir in does not show the parent folder item
 - 02-03-2006 fixed: Musicdatabase paths weren't compared case-insensitive (albums + songs could double up if scanned from 2 different cased bookmarks)
 - 02-03-2006 changed: Overlay images are rendered in bottom right of thumb only. Image is sized so that it is the normal size in Big Thumbs view, and is scaled for normal thumb views.

- 02-03-2006 fixed: Possible crashes setting things such as default bookmark.

- 02-03-2006 changed: Rewrote the ShowIMDB function. Now any existing thumbnails will be used in the Show Information dialog.
